

# Leading the way:

## How local and regional government can best support community led housing

Tuesday 8<sup>th</sup> December 13:00-14:30 (Online)

Community led housing is on the rise. There are now 23,000 homes planned, 10,000 of which will be delivered in the next five years, and a network of 27 enabler hubs supporting groups.

The sector can play an important role in helping local authorities, combined authorities and LEPs meet their objectives for housing, regeneration and place making.

Community Led Homes and your local enabling hub invite you to this online event, which will showcase some of those best practice examples of support for community led housing by local government, regional government and LEPs and the ways in which the enabler hubs can best support authorities in meeting their objectives.

### Programme

13:00 Welcome and purpose of the event

13:05 Showcasing best practice – exemplary support from local and regional authorities

*Why it matters to a Mayor: James Palmer, Mayor of Cambridgeshire and Peterborough (invited)*

*A combined authority investing in community led housing: Greater Manchester Combined Authority (invited)*
